### **Brief description of the problem**

The product is being recalled due to failure to comply with the release assay limits of Aluminium Hydroxide (95%-105%), which was identified during GMP inspection.

### **Action for healthcare professionals**

Quarantine all remaining stock and stop further distribution, sale, issuing or use of the above batches immediately. Await contact from Dawa Ltd to arrange the return.

### **Action for patients and caregivers**

No further action is required by patients as this is a Retail/hospital Pharmacy and Wholesaler/Distributor level recall. You are advised to talk to your healthcare professional if you have the above batches of Stopacid Suspension.
